📍 Ahmedabad, Gujarat

## SUMMARY

Enthusiastic software graduate with a passion for problem-solving and a track record of delivering results through collaboration. Excited to apply my coding skills to drive innovation and contribute to team success.

## EXPERIENCE

### Internship

#### TechRover Solutions

📅 05/2023 - 06/2023 📍 Ahmedabad

Techrover Solutions is an IT company that develops software and provides innovative solutions to clients. We are dedicated to delivering top-notch technology solutions.

- During my internship at Techrover Solutions Pvt Ltd, I gained invaluable hands-on experience in **MERN stack**, honing my abilities in Software Development and contributing actively.
- Contributed actively to team projects, collaborating with colleagues to troubleshoot issues and optimize code for efficient performance and user experience.

### Attended TechFest

#### IIT Bombay

📅 12/2023 📍 Mumbai

Attended Digital Marketing and SEO workshop at IIT Bombay

- Gained thorough understanding of SEO strategies and their importance in boosting website visibility and attracting organic traffic.
- Attended Digital Marketing workshop at IIT Bombay Techfest, gaining insights into effective online marketing strategies, including SEO, social media, and content marketing.

## PROJECTS

### Restaurant Management System

🔗 [https://github.com/Anydevo0/Resturant\\_Managment\\_System](https://github.com/Anydevo0/Resturant_Managment_System)

Contributed as a Frontend developer to the development of a comprehensive Restaurant Management System utilizing PHP and MySQL database, streamlining operations and enhancing efficiency for seamless restaurant management. Developed this as a group project in 2nd year.

### Vehicle Service Management System

🔗 [https://github.com/Anydevo0/Vehicle\\_Service\\_Management\\_System](https://github.com/Anydevo0/Vehicle_Service_Management_System)

Contributed as a Frontend developer to a 3rd year group-created Vehicle Service Management System using PHP and MySQL, enhancing efficiency in servicing and customer satisfaction.

### ToDo-List

🔗 <https://github.com/Anydevo0/To-do-List>

Built a dynamic ToDoList application using JavaScript, Node.js, and MongoDB, following the MERN stack architecture, to efficiently manage tasks and enhance productivity.

### myBlogApp

🔗 <https://github.com/Anydevo0/myBlogApp>

Introducing myBlogApp, a platform designed for users to document life's memories through blog writing. This intuitive web application, developed with Node.js, MongoDB, and EJS templates, empowers users to effortlessly create their blogs.

## STRENGTHS

### Problem Solving

Good at solving problems in software projects, making sure everything runs smoothly and clients are happy.

### MERN Stack Proficiency

Hands-on experience and expertise in MERN stack development for building efficient and scalable web applications.

### Communication Skill

Great at talking to others, explaining ideas clearly in both technical and regular language, helping team members work together smoothly.
